

MEASURING UP

Facilities Planning & Development Monthly Newsletter

DIRECTOR'S MESSAGE

The winter break has come and gone and we are starting a new year off with a bang. The modernizations at both Griffiths and Sussman Middle Schools are complete and the Facilities Department is planning some smaller projects on those sites to continue to improve the campus facilities. It is very rewarding to see projects complete and see the students and staff enjoying the new spaces. As I always say, none of this work would be possible without the support of the Downey community and the passing of our local Measure O bond. Thank you so much for the support!

Vince Madsen, Senior Director
Facilities Planning & Development
Downey Unified School District

Stauffer Middle School

The masonry contractors are on site continuing to lay concrete blocks for the Stauffer gym. The underground utilities are complete, and the contractor is getting things ready for the concrete slab inside the building.

Doty Middle School

Doty Middle School will start using their new gym building when they come back from Winter Break. Site work such as the completion of the two new parking lots and final landscape are underway.

IN THIS ISSUE

STAUFFER MIDDLE SCHOOL

DOTY MIDDLE SCHOOL

COMING SOON

In the last stages of the modernization project at Griffiths Middle School, nine interim housing portables were removed from the site which opened the space for a new addition to the staff parking lot. This addition will add 35 parking stalls enclosed by a new chain link fence and gates. Sussman and Doty Middle School will be adding new Culinary Arts classrooms. A new two-story classroom building is in the final design and approval stages and is projected to start construction at Stauffer Middle School after their Gymnasium building is completed.
