

MEASURING UP

Facilities Planning & Development Monthly Newsletter

DIRECTOR'S MESSAGE

We are still running at full speed here in the Facilities department! We are working on planning the finishing touches at the middle schools, and of course the ongoing current construction at Stauffer. We are getting things ready and are on schedule for our upcoming projects planned for the spring and summer breaks, and this great SoCal weather is an asset to all of our projects as we transition out of winter and move into spring. As always, I cannot say enough about the support of our Downey community!

Vince Madsen, Senior Director
Facilities Planning & Development
Downey Unified School District

Stauffer Middle School

The masonry contractor is continuing to stack the block walls for the gym while the concrete contractor is building the reinforcing steel for the concrete columns. The plumbing contractor has connected the fire sprinkler line and is currently working on the storm drain system. Lastly, the electrical contractor is installing raceways at stage area and exterior walls.
