DIRECTOR'S MESSAGE

School is back in session and the students and staff are settling in for another great school year! The Facilities Department is putting the final touches on our summer projects and are already looking forward to our construction activities for winter and spring. Things are going well with our last two major projects at Stauffer Middle School and we continue to wrap things up at our three other middle schools as well. On that note, we have some ribbon cutting events scheduled this month for our middle schools to showcase the work that has been completed during our Measure O bond program!

As we look forward to what's next, it's exciting to say thank you to the Downey community for their continued support of the DUSD Facilities Department. Without the support, most of the great facility changes and what we have been able to accomplish to improve our middle school campuses would have not been possible.

Vince Madsen, Senior Director

Facilities Planning & Development Monthly Newsletter

Stauffer Middle School

Stauffer Middle School's new gym is 85% complete. The contractor is currently finishing interior framing, and installing all drywall. Painting is also happening at the same time. Concrete foundations have been poured in place for the two story buildings (north and south). There are continuous efforts on moving forward with underground utilities and remaining foundation work.

The work around the existing lunch area is 90% complete. All three permanent lunch shelters, concrete and synthetic turf has been installed and complete. Next steps are painting, landscape work and existing planter beautification.

Sussman Middle School

Sussman Middle School's girl's locker room, showers and restrooms are in the last stages of construction. The tile is complete along with new toilets, sinks, partitions and accessories.

Doty Middle School

Doty Middle School's sound panel's in the new gym have been installed.
