

# The Benefit of a Lifetime

The age factor

**CALSTRS**  
HOW WILL YOU SPEND YOUR FUTURE?

Your CalSTRS monthly retirement benefit is a defined benefit pension calculated using a formula that provides a fixed percentage of your final compensation based on your age at retirement and your years of service credit:

**service credit x age factor x final compensation = your retirement benefit**

The age factor is a percentage determined by your age in years and months on the last day of the month in which your retirement is effective. Reference your benefit structure's age factor table to determine your age factor at retirement.
